Fundraising assistance:

Presentation materials: We can e-mail colorful product information on specific models for you to share with prospective donors or at budget and staff meetings.

Images and information for fundraising literature: We can provide images and product information to help with flyers, posters, in-house newsletters and wish lists. This helps describe how a system will be used in your facility and the benefits to your patients, families and staff. If needed, we are able to help with copy and formatting of these items.

Kidzpace systems for display: In some cases, we will ship you a sample Kidzpace product or system for hands-on fun and to help build excitement for fundraising efforts.

Donor recognition ideas:

Custom screens at no charge: For the popular Touch2Play system, this feature welcomes visitors to your facility and can recognize any donors. A full sized screen-saver displays when the game is idle, and a vertical sidebar is displayed continuously. We can also create a custom screen for the main page on an Xbox system.

Press releases: We can help create newsletter and newspaper articles, press releases and other items to publically express your gratitude to donors.

Let us know how we can help!

Kidzpace products are designed for durability and dependability for many years of use. Our commitment to providing excellent customer service and satisfaction to you will always be our number one priority. And, part of that service is to help you communicate about our products to obtain funding and support.
