

Kidzpace products have been designed and manufactured for use in healthcare facilities for over 20 years.

General Care and Maintenance

You may use Virex II 256, Super Sani-Cloth germicidal wipes or similar as acceptable cleaners.

Always apply cleaner to a cloth and not directly on the unit. Liquids could enter the cabinet and damage the electronics inside.

The Touch2Play cabinet must have the cover removed and all dust blown out on a regular basis to ensure proper operation of the Touch2Play system. **It is important that airflow is unobstructed.** Do not recess the Touch2Play into a wall or cavity and make sure nothing is placed inside or next to the cabinet that would inhibit the flow of air.

Do not use any abrasive solvents (like Windex), acid or vinegar-based cleansers on the monitor. Over time, such cleaners could harm the touch screen. Be careful not to use commercial cleaners containing any of these substances.

The Touch2Play unit is setup to do an automatic restart once a day, the unit must be left on 24/7 and should not be turned off via light switch, timer or breaker as this will eventually corrupt the hard drive.

**Should you require technical assistance please call
1-800-668-0206 and press 1 when prompted.**

NOTE: The Touch2Play unit, inside the protective cover, should never be opened as there are high voltage parts that can cause electrical shock.
